

WEEK 1

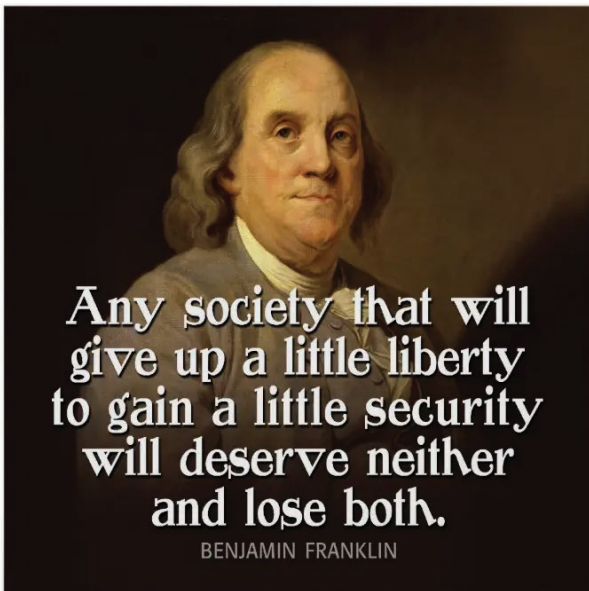

THE FEDERALIST PAPERS & ELECTIONS

OCTOBER 1ST TO 8TH

THE KEEPING OF TIME

October loses 10 days from the Julian Calendar, (1582) as Pope Gregory XIII makes corrections. History offers many insights, if we take time to understand both what has occurred and learn what might be the Truths to be understood. As for calendars, the Julian and Gregorian calendars are two that come to mind. The Gregorian, which is also known as the Western or Christian calendar, is the one most widely used today. Small problem, the keeping of time. To adjust, and to accommodate for the science in calculating time, the Pope decided by Papal decree to just skip 10 days in October to make up the difference.

On the 4th we are **35 days** from the election. **How are you preparing, and how are you making a difference with your vote and in your community?** There has been an awakening of sorts as people are asking questions about the election process and getting behind candidates that will listen to their concerns. In the troubling times we find ourselves in currently, we might do well to remember the words of a founding father. Benjamin Franklin stated, "They who can give up essential Liberty to obtain a little temporary safety, deserve neither Liberty nor safety."

Take time to learn about how elections may be compromised in your community. Ask questions of your elected officials, including your Auditor and others. Test to see how transparent your election has become. Find out if you can access your Cast Vote Records, or if you can request an Audit of your election system. Many states like Washington, have become so restrictive, that virtually all records are off limits to the public. The public is being told that election systems and equipment are not accessible via the Internet, that the printing of ballots are secure, voter rosters are clean with only approved and legitimate voters included, that computers used are not accessible to source code manipulation. **Believable?** Yet in all this, voters are not allowed to conduct 3rd party Audits of the election systems, to validate what they have been told. **"We The People"** should have a right to expect the same level of accountability in our elections, that we expect within private industry. This is our Republic. Battles have been fought to preserve not just our freedoms, but the right for freedoms to be enjoyed for anyone that we have ever supported in a war conflict. *This is our time, to ensure a legacy for future generations.*
