

WEEK 2 – APRIL 3RD TO 9TH

REBUILDING

AT HOME

CONTINUE THE STORY

AND ABROAD

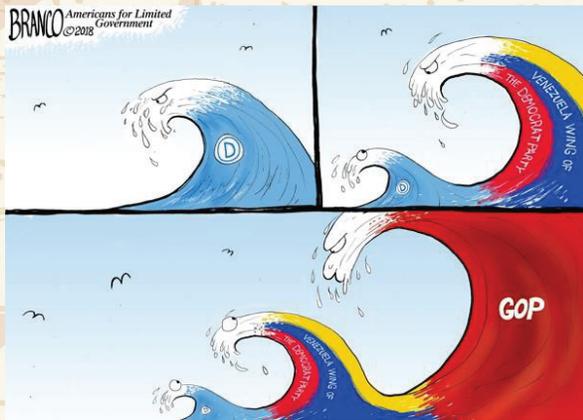

ON APRIL 3RD, RAMADAN BEGINS.

This is recognized during the 9th month of the Islamic Lunar Calendar, observed by **fasting, reflection and prayer**. Commemorating the first revelation of Muhammed, observance of this month is considered one of the five pillars of Islam. The time for observance lasts for about 30 days.

ON THE 5TH, WE HAVE 217 DAYS TILL THE MIDTERM ELECTIONS, WHAT WILL WE EXPERIENCE?

A **Red Wave**, **Blue Wave** or no change at all? **Will voters' confidence be high regarding the voting systems?** **Will border security be a focus in discussions?** Or, should we be focused on voting for candidates that will adhere to Constitutional Principles and will begin to hold leadership in this country accountable?

THE END OF A WAR:

On the 9th in 1865, the Civil War ends as General Robert E. Lee surrenders to General Grant at the Appomattox Court House. What America would come to learn was that ending a War is one thing, rebuilding is a whole new challenge.

Old habits were hard to change, as their remained influences to keep Black's in some level of secondary citizen class. Out of this turmoil, debate and action came the 14th Amendment, expanding citizenship to all African-American men as well as the children of immigrants. Granting citizenship to all African-American Men, then further emboldened Women to take up their fight for Women's Suffrage.

In 2022 as we watch the Rally's regarding Mandates, in global markets, we begin to observe the recognition for Freedom's globally. We may be reminded of the rights we retain in America and how these came to be recognized. Founding Fathers saw in the Magna Carta, later in the Declaration of Independence and finally in our US Constitution an individual's right to petition and seek redress for wrongs. This is the right to Petition our elected leaders. A right which has been overlooked for some time.

As we wake-up as a society, perhaps we will renew our interest in the Truths recognizing the Natural Law that people have to Petition their elected leaders regarding wrongs that are perceived, and to seek for redress or compensation.
